

Swift Ship Tracker – Ideation Phase

Problem Identification

Customers may need to switch between applications or contact support to understand parcel status and delivery progress.

Proposed Solution

Create a centralized Salesforce CRM solution with parcel data, automated delivery workflows and a conversational Agentforce interface.

Users

Customers/Senders, Receivers, Delivery Agents, Support Staff and Administrators.

Core Use Cases

Parcel booking, parcel tracking, delivery status updates, automated notifications, operational reporting and AI-assisted customer support.

Technology Selection

Salesforce CRM, Custom Objects, Flow Builder, Apex, Lightning Web Components, Agentforce and Prompt Builder.

Expected Outcome

A scalable academic prototype demonstrating end-to-end parcel lifecycle management with automation and AI assistance.
